

## PERTEMUAN 9

### Pokok Bahasan :

 Create

#### ➤ Create

Buka Kembali File Di pertemuan sebelumnya, Kemudian tambahkan Tombol Tambah untuk mengarahkan ke Form untuk insert data, sebagai contoh kita akan membuat form insert data.

Buka file **dataadmin.php** kemudian tambahkan kode berikut

```
<form name="tambahadmin" action="tambahadmin.php" method="post" >
<input type="submit" class="btn btn-lg btn-primary" value="Tambah">
</form>
```

Sehingga menjadi

```
1. <?php
2. require_once ("inc/koneksi.php");
3. ?>
4. <!DOCTYPE html>
5. <html>
6. <head>
7.
8. <style type="text/css">
9. <!--.style1 {color: #FFFFFF}-->
10.     </style>
11.     </head>
12.
13.     <body>
14.     <h3>TABEL Admin</h3>
15.
16.         <form name="tambahadmin" action="tambahadmin.php"
            method="post" >
17.             <input type="submit" class="btn btn-lg btn-
                primary" value="Tambah">
18.         </form>
19.
20.
```

```

21.     <table cellpadding="0" cellspacing="0"
      border="1px" class="table">
22.         <thead>
23.             <tr bgcolor="#000033">
24.                 <th><CENTER style="">
25.                     <span class="style1">ID
      Admin</span></th>
26.                 <th><CENTER style="">
27.                     <span
      class="style1">Username</span></th>
28.                 <th><CENTER style="">
29.                     <span
      class="style1">Password</span></th>
30.
31.
32.             </tr>
33.         </thead>
34.         <tbody>
35.             <?php
36.                 $query = mysqli_query($con,"SELECT *
      FROM admin");
37.                 while ($record =
      mysqli_fetch_array($query)) {
38.                     <?>
39.                     <tr class="active">
40.
41.                         <td> <CENTER style=""><?php echo
      $record['id_admin']; ?></td>
42.
43.                         <td> <?php echo $record['username'];
      ?></td>
44.                         <td> <?php echo $record['password'];
      ?></td>
45.
46.                     </tr>
47.                 <?php } ?>
48.             </tbody>
49.         </table>
50.     </body>
51.
52. </html>
53. <?php
54.     mysqli_close($con);
55.     ?>
56.

```

**TABEL Admin**

| Tambah   |          |          |
|----------|----------|----------|
| ID Admin | Username | Password |
| 1        | admin    | admin    |
| 2        | admin2   | admin2   |

Buat File baru : **tambahadmin.php**

```

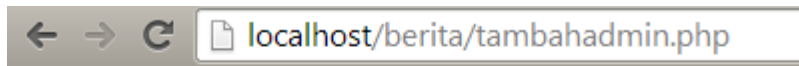

1. <?php
2. require_once ("inc/koneksi.php");
3. ?>
4.
5. <!DOCTYPE html>
6. <html>
7. <head>
8.
9. <style type="text/css">
10.     <!--
11.     .style1 {color: #FFFFFFF}
12.     -->
13. </style>
14. </head>
15.
16. <body>
17. <h3>Tambah Admin</h3>
18. <form action="" method="post">
19. <table width="200" border="0">
20.     <tr>
21.         <td>username</td>
22.         <td><input name="username" type="text"></td>
23.     </tr>
24.     <tr>
25.         <td>password</td>
26.         <td><input name="password" type="password"
27. id="password"></td>
28.     </tr>
29.     <tr>
30.         <td colspan="2"><input name="submit"
31. type="submit" value="Insert"></td>
32.     </tr>
33. </table>
34. </form>
35. </body>
36. </html>

```

```

37.     <?php
38.         if(isset($_POST['submit'])) {
39.
40.             $query="insert into admin (id_admin,
                username,password) values
                ('','".$_POST['username']."'','".$_POST['password']."' )
                ";
41.
42.             //eksekusi query
43.             $hasil=mysqli_query($con,$query) or die
                (mysql_error());
44.             ?>
45.
46.             <script>
47.                 alert("data sukses ditambahkan");
48.                 window.location='dataadmin.php';</script>
49.             <?php
50.             }
51.             ?>

```

### Tambah Admin

username

password

**TUGAS : BUATLAH MODUL CREATE UNTUK SEMUA TABEL!**
